Education

SMK-IT As-Syifa Boarding School, Subang

2024 - 2027

Software Engineering

MTSN 31 East Jakarta

2021-2024

Projects

Laundry – School Laundry Management System

- Built with HTML, Bootstrap, and MySQL to manage laundry services.
- Implemented role-based authentication (Admin, Employee, Student) with different access levels.
- Students can submit laundry requests, while Admins monitor transactions and manage reports.
- Designed to streamline school laundry operations with a simple and responsive UI.

NewsApp – Mobile News Application

- Developed a Flutter-based mobile app to display real-time news.
- Integrated with a REST API to fetch and update the latest articles dynamically.
- Designed a clean and user-friendly interface for a better reading experience.
- Focused on API consumption, state management, and responsive UI design.

Vlab – Software House Platform (TEFA SMK Project)

- Designed the entire UI/UX of the platform using Figma.
- Created interactive prototypes to visualize user flows and project presentation.
- Focused on responsive layouts, clean typography, and consistent design system.
- Collaborated with the development team to ensure the design was accurately implemented.
- Aimed to represent the school's software house and highlight student projects with a professional look.

ToDo List – Task Management Web Application

- **Built with Laravel and MySQL for task management.**
- **Implemented authentication system (login & register) to secure user accounts.**
- **Features include CRUD operations, search, and task filtering.**
- **Enhanced with a modern dashboard UI for better usability and efficiency.**

StoreApp – Mobile E-Commerce Application

- **Created with Flutter, Firebase, and API integration for digital product sales.**
- **Implemented Firebase Authentication for secure login and registration.**
- **Features include product catalog, shopping cart, order history, and digital transactions.**
- **Provided a professional experience in real-world e-commerce application development.**

Cook-Kie – Recipe Finder Application

- **Built with Flutter and integrated with a REST API to fetch recipe data.**
- **Users can search recipes, view detailed ingredients, and step-by-step cooking instructions.**
- **Implemented category-based filtering for easier recipe discovery.**
- **Designed with a modern and responsive UI to provide a smooth cooking guide experience.**
- **Aimed to help users find and try new recipes conveniently through a mobile app.**

Organizational Experience

- **School Student Organization – Rohis Devision (2023)**
- **Student Council (2022)**
- **School Media Team (2024)**

Competitions & Events

- **Futsal – Daarut Tauhid**
- **Photography Contest – Albacadabra Al-Bayyan**
photography competition finalists
- **Futsal – POP(Pekan Olahraga Pelajar Suabng)**

Technical Skills

- **Leadership Skills**
- **Discipline Management**
- **Financial Responsibility**
- **Team Coordination**
- **Problem Solving**
- **Web Development (Laravel,TailwindCSS)**
- **Mobile Development (Flutter, Firebase)**
- **Database Management (MySQL, Firebase)**
- **API Integration (REST APIs)**
- **UI/UX Design (Figma, Wireframing)**
- **Version Control (Git, GitHub)**
- **Project Management & Collaboration**

Programming Languages & Tools

- **PHP, Dart, JavaScript, SQL**
- **Laravel, Flutter,**
- **TailwindCSS,MySQL,**
- **Firebase**
- **Figma, FigJam**

Languages

- Indonesian – Native
- English – Intermediate (reading, writing, speaking)
